

## A Course Study in Barack Obama and the consequences for America

**"You can question my policies without questioning my faith, or, for that matter, my citizenship"** a statement by President Barack Obama on February 3, 2010. Someone needs to tell this President that "character" has everything to do with being President of the United States—moral fiber, "mean what you say and say what you mean", ethics and honesty and openness and integrity, and yes, Mr. President, "proof" that you are a "natural born citizen" with allegiance to the United States and not some foreign country is necessary to hold the office of President of the United States.

This commentary begins a **series of articles** on Barack Obama which will be covered monthly on this website. This work is based on the **new** "Kerry Theory" software programming that will soon become available.

Barack Obama was extremely popular during the time frame before and leading up to the Election of 2008. Barack Obama, a man with really no experience, who accomplished nothing as a Senator, a man with a hidden past, promoting the word "change" and "hope", was chosen by the majority of Americans and many still do not know why. He flew around the country almost daily pitching his slogan "yes, we can". He promised something for everyone.

On December 25, 2008, just after the Election and before Barack Obama was to be sworn in as President, a significant change took place in his astrological chart\*. Transiting Neptune moved to within a 3-degree "negative" orb of his natal Uranus.

**So what does that mean?** Well, according to astrology, this influence always produces the same response. This influence is not something that is made up or interpreted by someone trying to understand what is happening in his chart. The mathematical distance between transiting Neptune and his natal Uranus is called an opposition or 180 degree aspect, and produces the same influence each and every time. Neptune is "dream-like" and tends toward impracticality. Neptune creates a time of uncertainty and produces situations that are never understood, where facts are distorted or misrepresented. Uranus when "negative" takes on strong-willed tactics, and acts with precipitous behavior and determination to do something a certain way and takes no counsel.

**Neptune "negative" Uranus** brings on unknown situations which pose a threat because they are secretive, persuasive although deceptive in origin, the motives are never clear and the outcomes are always in doubt.

\*The natal chart of Barack Obama seems to be in doubt, so all readings in these articles have a wider orb, until further verification can be made.

This influence began operating for President Obama on December 25, 2008, and this is the influence that **he is still under** and will continue to be under through February 13, 2011, more or less. What is even more unique is that using the “Kerry Theory” software we can now determine the “peaks” or the strongest times during this long cycle.

On February 5, 2009, shortly after taking office, Mr. Obama spoke at Williamsburg, VA, **to sell his Stimulus Package of almost a trillion dollars.** This was the chart for Mr. Obama on February 6, 2009, which reflects the next natal Direct Energy Planet, or natal Uranus, to be energized in his chart.

Jupiter	Venus	Mercury	Pluto	Neptune	Sun	Mars	Uranus	Saturn	S. Node
0.92	1.19	1.28	6.96	8.60	12.04	22.25	25.24	25.37	27.31

The computer program has rules to follow when there is a natal Direct Energy Planet (DEP), a planet that has energy from both Mercury and the Sun within a 3-degree orb. The computer looks for any natal planet that is in the same sign as any natal DEP and, if there is, it becomes a natal DEP equivalent, then looks for any other natal planet within a 3-degree orb of the natal DEP, either “positive” or “negative”. Here, natal South Node (which causes misfortune and hardship) is within a 3-degree or closer “negative” orb (opposition aspect) to natal Uranus. The computer also looks for 3-degree orb or closer connections between transiting planets and natal planets by looking for a transiting planet in the same zodiac sign as either the natal DEP or DEP natal aspect. Here the connection is clearly transiting Neptune in the same sign as the natal South Node (both in Aquarius). This is most likely more information than you require, but I wanted to show you that math is involved in each operation and each aspect is set in stone—meaning that the same planetary influence will cause the same outcome in everyone’s chart, not just Mr. Obama’s. You no longer need any ESP, intuition, interpretations, or guesses as to what is occurring.

Jupiter	Venus	Mercury	Pluto	Neptune	Sun	Mars	Uranus	Saturn	S. Node
0.92	1.19	1.28	6.96	8.60	12.04	22.25	25.24	25.37	27.31

Aqu	Cpr	Ari	Aqu	Leo	Aqu	Vir	Pis	Cpr	Aqu

**Neptune “negative” Uranus** brings on unknown situations which pose a threat because they are secretive, persuasive although deceptive in origin, the motives are never clear and the outcomes are always in doubt.

**South Node-Aquarius/Jupiter-Aquarius** causes poor judgment and mistakes, or just plain carelessness.

The bill in its final written form was not given to any committee member to read, let alone study, before the final vote commenced. **INCONCEIVABLE AS THIS SOUNDS, THE BILL PASSED WITHOUT THE FULL KNOWLEDGE OF THE CONTENTS.** Obama promised transparency, but what the American people really got was ambiguity.

On September 9, 2009, a congressman by the name of Joe Wilson shouted out, **“You lie”**, during the speech that the President was delivering to Congress on his health care bill—**an unprecedented event.** It was a spontaneous response by Mr. Wilson when in fact he knew the President was not being truthful. This time natal Jupiter is our natal Direct Energy Planet (DEP).

Jupiter	Venus	Mercury	Pluto	Neptune	Sun	Mars	Uranus	Saturn	S. Node

Cpr	Lib	Can	Leo	Vir	Aqu	Vir	Aqu	Pis	Can

Jupiter in **Aquarius** shares the same energy as the natal South Node in **Aquarius**, which is within the 3-degree orb to natal Uranus, and the computer pulls up the same influence.

Jupiter	Venus	Mercury	Pluto	Neptune	Sun	Mars	Uranus	Saturn	S. Node
0.92	1.19	1.28	6.96	8.60	12.04	22.25	25.24	25.37	27.31

Cpr	Lib	Can	Leo	Vir	Aqu	Vir	Aqu	Pis	Can

**Neptune “negative” Uranus** brings on unknown situations which pose a threat because they are secretive, persuasive although deceptive in origin, the motives are never clear and the outcomes are always in doubt.

**South Node-Aquarius/Jupiter-Aquarius** causes poor judgment and mistakes, or just plain carelessness.

On January 27, 2010, Mr. Obama gave the **State of the Union Address** and the cameras caught a stunned Supreme Court Justice Alito, who was sitting with the other Supreme Court justices, **mouthed the words, “Not true”**, when President Obama criticized a decision that the justices had made.

At first you might say, "Well, it is a different planet that is the natal Direct Energy Planet", but this does not matter. Transiting Mars is in the sign of **Leo** and our natal connection planet is **Uranus in Leo**.

Jupiter	Venus	Mercury	Pluto	Neptune	Sun	Mars	Uranus	Saturn	S. Node
0.92	1.19	1.28	6.96	8.60	12.04	22.25	25.24	25.37	27.31
Aqu	Can	Leo	Vir	Sco	Leo	Vir	Leo	Cpr	Aqu

Pis	Cpr	Lib	Aqu	Leo	Aqu	Cpr	Can	Pis	Aqu

Again, natal Uranus is within the 3-degree orb to the natal South Node which shares the transiting connection with Neptune in the same sign and AGAIN transiting Neptune is "negative" natal Uranus.

Jupiter	Venus	Mercury	Pluto	Neptune	Sun	Mars	Uranus	Saturn	S. Node
0.92	1.19	1.28	6.96	8.60	12.04	22.25	25.24	25.37	27.31

Pis	Cpr	Lib	Aqu	Leo	Aqu	Cpr	Can	Pis	Aqu

**Neptune "negative" Uranus** brings on unknown situations which pose a threat because they are secretive, persuasive although deceptive in origin, the motives are never clear and the outcomes are always in doubt.

**South Node-Aquarius/Jupiter-Aquarius** causes poor judgment and mistakes, or just plain carelessness.

The computer does not "lie"—it is programmed with what each alignment produces. Mr. Obama is in a very difficult time because as more time goes by, more people will notice his pattern of behavior. If these had been swift-moving planets, the occurrences might even go unnoticed.

It has now become apparent that Mr. Obama is a "game changer"—that is what the planet Uranus does—it changes things, usually suddenly, without warning. However, Uranus comes in good and bad packaging, but Mr. Obama has it "negative" to Neptune.

What is even more unique is that we can follow exactly how this natal attribute will play out over the course of time from December 25, 2008, to February 13, 2011.

**February 7-8-9, 2010.** We have the **same influence as above continuing**, but transiting Venus also joins this complex as it passes through the last degrees of the sign Aquarius. From this position transiting Venus will be "negative" to his natal Uranus.

**Venus “negative” Uranus** separates or causes abrupt changes in matters relating to relationships, social events, or things we care for. Mr. Obama can anticipate many of his constituents, some Democrats, and perhaps some of the “media” will begin to run away from his policies. They will begin to see his “negative” influence and want to separate themselves from his views and policies.

**February 12-13, 2010.** Transiting Mars in Leo is stimulated and therefore the same Neptune “negative” Uranus influence that we discussed above will surface. However, for those of you using the software programming will note, by viewing Rule 5, you see that the Mars-Leo, Uranus-Leo energy chain is now stimulated because President Obama has transiting Uranus within the 3-degree “negative” orb to his natal Mars. **Mars “negative” Uranus** creates a condition where people tend to live on the edge of recklessness. The drive for personal freedom is strong, there is willfulness in the nature, and a lack of moderation does bring on radical and sometimes shocking results. Accidents or misfortunes are common under this influence because of a lack of restraint or caution.

**February 14-16, 2010.** A break from the trend or the tendency of his chart. Transiting Jupiter is trine (120 degree aspect) to his natal Neptune, which is a natal Direct Energy Planet (DEP) during this time frame. Both transiting Venus and Uranus join transiting Jupiter in this trine to natal Neptune. Mr. Obama can anticipate unexpected benefits from family, friends, or acquaintances that will help to enlighten or bring emotional happiness. This is a time frame where the matter-of-fact information of life is placed on the back burner and the personal emotions are given a stimulus and are helped in some beneficial way.

**February 16-21 and 24-28, 2010.** Natal Jupiter is again a natal Direct Energy Planet and thus the Neptune “negative” Uranus pattern returns.

**Neptune “negative” Uranus** brings on unknown situations which pose a threat because they are secretive, persuasive although deceptive in origin, the motives are never clear and the outcomes are always in doubt.

**South Node-Aquarius/Jupiter-Aquarius** causes poor judgment and mistakes, or just plain carelessness.

Mr. Obama’s chart for March will appear here a few days before the month begins. I would be interested in any of your comments. Write [info@kerrytheory.info](mailto:info@kerrytheory.info).
